### DESCRIPTION

I'm 25 years old. I have a bachelor's degree in Software Engineering and multiple specializations in fields such as data science, computer science, leadership and artificial intelligence.

In my more than 9 years of work experience, I have managed to develop full-stack developer, designer, data engineer, software architect and CTO positions in multiple technology companies.

I have worked with multiple programming languages such as PHP, JS, Python, R, Java, C# and C++. Currently I focus on the development of cross-platform web systems with JS (ReactJS, NodeJS & NextJS) and the creation of artificial intelligence (Python, Dialogflow & PHP).

### WORK EXPERIENCE

(LAST 5 - MORE DETAIL ON MY WEBSITE AND/OR LINKEDIN)

#### Fullstack Software Developer

Ardent Inc.

Oct 2023 - Present

- Implemented a robust tech stack including Next.js, React, Livewire, Tailwind, Alpine.js, Styled Components, and Astro to deliver intuitive front-end interfaces.
- Used PHP & Laravel to craft versatile endpoints, integrating seamlessly with APIs likeAlchemy and Moralis, managing diverse data streams with efficiency.
- Pioneered the development of a cutting-edge crypto wallet web extension using SDKs and React JS. This worked with Chrome and Firefox web browsers.

#### Fullstack Software Developer

Divvy | DeFi Ventures Inc.

Oct 2022 - Sep 2023

- Refactored 100% of all company frontend repositories, reducing the total size of their files by up to 40% and increasing deployment times by up to 20%.
- Implemented a more modern technology stack to the software, using TypeScript, NextJS, Redux, React Query, TailwindCSS, and Styled Components.
- Developed numerous backend endpoints for real-time communication with the Solana blockchain and our database. Reduced vulnerabilities in repositories by 70%.
- Added geo IP services, 2FA and many other security layers using AWS.

#### Senior Full Stack Developer

Turn Technologies, Inc

Dic 2021 - Dic 2022

- Led the entire Frontend team of 6 people to implement a new tech stack for the 4 company platforms. This included providing mentoring, and training to the team.
- Designed and programmed "Advise", the company's third product, a Talent Acquisition solution using Artificial Intelligence.
- Refactored the company's FE repositories using Typescript, NextJS, TailwindCSS, Redux, and Apollo/GraphQL. Increased the test coverage by 80% using Jest and RTL.
- Developed endpoints using Python, FastAPI and Flask. Deployed them using AWS services.

#### Full Stack Engineer, Founder and CEO

Anqarapp E.I.R.L.

Mar 2020 - Nov 2021

- Managed to train more than 10k teachers in more than 5 Latin American countries during the pandemic.
- Planned, designed, and developed the frontend and backend of the platform using Laravel, Livewire, React.js, and TailwindCSS.
- Developed a 4-tier cloud architecture, that supported +5000 simultaneous users. Implemented - the adaptive teaching model to the platform, allowing all users to learn within it 24/7, through the use of AI and ML.

#### Principal Software Engineer & Founder

VacunaTravel

Jan 2021 - Jul 2021

- Planned, designed, and developed the entire backend and frontend of the company, resulting in a multiplatform web system using Laravel, ReactJS, TailwindCSS and NodeJS.
- Increased test coverage by 85% in all company repositories.
- Implemented an AI that allowed the monitoring of more than 300 patients and users of the platform. I used Python, Facebook API and Tensorflow for this.
